INSTALLATION INSTRUCTIONS

This installation guide will provide you with all the instructions required in order to correctly install your unit.

1. The unit should be installed according to the instructions provided here, and to the electrical and plumbing standards of your local area. The unit is designed for use indoors and should be installed in a location where it can be accessed for maintenance and repairs.

2. The unit should be installed in a location where it will not be exposed to extreme temperatures or moisture.

3. The unit should be installed on a level surface, and should be properly secured to the wall or floor to prevent it from moving during operation.

4. The unit should be connected to the water and electrical supply using the correct size and type of fittings.

5. The unit should be connected to the water and electrical supply using the correct size and type of fittings.

OPERATING INSTRUCTIONS

1. OPEN THE TAP TO ALLOW FOR A GOOD FLOW OF WATER TO START HEATING. (YOU WILL HEAR THE MICRO SWITCH CLICK)

2. SLOWLY REDUCE THE FLOW OF WATER UNTIL THE DESIRED WATER TEMPERATURE IS REACHED

3. If the unit does not heat, check the following:
   - Is the circuit breaker on and is it correct for the load?
   - Is the outlet that will interrupt or stop the heating the correct one?
   - Is the outlet that will interrupt or stop the heating the correct one?

4. If the unit still does not heat, review the installation and operation of the unit.

5. If the unit still does not heat, review the installation and operation of the unit.

WARRANTY

THERE IS A HIDDEN VERSION OF THE MANUFACTURER'S GUIDE IN THE BASEMENT OF THE UNIT. THIS GUIDE CONTAINS IMPORTANT INSTALLATION AND OPERATING INSTRUCTIONS. THE MANUFACTURER RESERVES THE RIGHT TO MAKE CHANGES TO THE UNIT WITHOUT NOTICE.
